Assessment

Week 9 : Assignment

The due date for submitting this assignment has passed. As per our records you have not submitted this assignment.

Due date on 2026-09-23, 23:59 IST

1. Which of the following characteristics distinguish a research programme from a regular curriculum-oriented academic programme? 1 Point

- [ ] The research question may itself require extensive exploration before becoming well defined.
- [ ] Experimental outcomes may deviate from expectations and require modification of the research approach.
- [ ] The programme follows a highly predictable schedule with predefined learning outcomes for every stage.
- [ ] The researcher may repeatedly formulate new questions as insights emerge from previous work.

You didn't attempt this question well in time. Score: 0

Accepted answer is The research question may itself require extensive exploration before becoming well defined., Experimental outcomes may deviate from expectations and require modification of the research approach., The researcher may repeatedly formulate new questions as insights emerge from previous work.

2. The lecture compares the research journey to a roller-coaster ride primarily because: 1 Point

- ( ) Research requires researchers to work continuously under high pressure.
- ( ) Research consists of predictable stages followed by unavoidable examinations.
- ( ) Research involves alternating periods of progress, uncertainty, setbacks, breakthroughs, and renewed progress.
- ( ) Research is primarily dependent on collaboration with a large number of researchers.

You didn't attempt this question well in time. Score: 0

Accepted answer is Research involves alternating periods of progress, uncertainty, setbacks, breakthroughs, and renewed progress.

3. According to the lecture, which factors can contribute to the overall research experience of a scholar in a laboratory? 1 Point

- [ ] Relationships with advisers and labmates
- [ ] Emotional experiences and friendships
- [ ] Availability and accessibility of research facilities
- [ ] Support received from friends and family

You didn't attempt this question well in time. Score: 0

Accepted answer is Relationships with advisers and labmates, Emotional experiences and friendships, Availability and accessibility of research facilities, Support received from friends and family

4. Which practices are presented in the lecture as useful for maintaining a sustainable rhythm in research life? 1 Point

- [ ] Adequate sleep and physical activity
- [ ] Taking time for recreation and renewal
- [ ] Reflecting periodically on one's activities and decisions
- [ ] Working continuously for extremely long hours whenever a problem arises

You didn't attempt this question well in time. Score: 0

Accepted answer is Adequate sleep and physical activity, Taking time for recreation and renewal, Reflecting periodically on one's activities and decisions

5. A researcher receives harsh feedback from an adviser and immediately feels angry and personally inadequate. Based on the lecture, what should be the most appropriate immediate response? 1 Point

- ( ) Respond immediately to the adviser to defend the research.
- ( ) Suppress the emotion completely and continue working without reflection.
- ( ) Pause, recognize the emotion, regulate it through techniques such as rhythmic breathing, and then respond with greater clarity.
- ( ) Discuss the adviser's behaviour with all labmates immediately.

You didn't attempt this question well in time. Score: 0

Accepted answer is Pause, recognize the emotion, regulate it through techniques such as rhythmic breathing, and then respond with greater clarity.

6. Which of the following strategies are specifically discussed in the lecture as ways of processing or reducing intense anger? 1 Point

- [ ] Practicing rhythmic breathing
- [ ] Temporarily stepping away from the situation
- [ ] Journaling what one is feeling
- [ ] Immediately confronting the person responsible for the trigger

You didn't attempt this question well in time. Score: 0

Accepted answer is Practicing rhythmic breathing, Temporarily stepping away from the situation, Journaling what one is feeling

7. A research scholar feels discouraged after a labmate's paper is accepted while their own paper remains unpublished. Which response best reflects the approach advocated in the lecture? 1 Point

- ( ) Compare the two researchers and conclude that the labmate is more capable.

- Suppress the feeling of comparison without examining its cause.
- Convert the comparison into curiosity by investigating what the labmate did differently and identifying possible improvements in one's own approach.
- Avoid interacting with the labmate until one's own paper is accepted.

You didn't attempt this question well in time. Score: 0

Accepted answer is Convert the comparison into curiosity by investigating what the labmate did differently and identifying possible improvements in one's own approach.

8. According to the lecture, prolonged emotional distress or isolation can negatively affect which aspects of a researcher's life? 1 Point

- [ ] Research progress
- [ ] Only the researcher's publication record
- [ ] Physical health
- [ ] Friendships and social relationships

You didn't attempt this question well in time. Score: 0

Accepted answer is Research progress, Physical health, Friendships and social relationships

9. A researcher becomes stuck on a difficult problem and begins working for very long hours while withdrawing from friends and labmates. According to the lecture, what is the primary concern with this response? 1 Point

- It demonstrates insufficient commitment to independent research.
- Emotional isolation may worsen the situation and negatively affect research progress as well as personal well-being.
- Long working hours always produce incorrect experimental results.
- Researchers should never attempt to solve difficult problems independently.

You didn't attempt this question well in time. Score: 0

Accepted answer is Emotional isolation may worsen the situation and negatively affect research progress as well as personal well-being.

10. Which of the following constitute potential support systems for a research scholar according to the lecture? 1 Point

- [ ] Adviser or supervisor
- [ ] Labmates and friends
- [ ] Mentor
- [ ] Family or old friends

You didn't attempt this question well in time. Score: 0

Accepted answer is Adviser or supervisor, Labmates and friends, Mentor, Family or old friends
